

## Bridget Project - MD

"We are very pleased with our new joint elevated and ground level patios, and the brick retaining wall and pillars are just what we were looking for" - Ms. Bridgett

Bridget Residence Project

Project Type: Retaing Wall / Concrete Patio

Client: Residential

Location: Temple Hills, MD

Value: \$

Completion: 2009

Our Role: General Contractor

Nova Concrete Construction, Inc. was emailed a Request for Proposal to provide plans and engineering to facilitate

- Demolish and Remove Existing Structures

- Replace with Brick Retaining Wall (Concrete Reinforced) and
- Replace with Concrete Patios (inc. Elevated Structure)
- Provide Ornamental Railings.

Nova proposed pricing and was awarded the project by the owner upon her receipt of our proposal. The owner was content with the specifications set forth and the price was deemed within her budget. The project was commenced and engineered solutions to previously established complications were put into play, making the project a success from the first day onsite.
